

# Bring Your Own iPad Program 2024

## Year 6

The Eagle Junction State School BYO iPad program supports digital literacy, allowing students to investigate, communicate and create using ICT across the curriculum.

### Managing an iPad

#### Student responsibilities

- To bring a fully charged iPad to school *every day* with enough storage space for school projects.
- To ensure careful handling of the iPad, especially when transporting to and from school.
- To adopt responsible behaviours when using devices in accordance with the Eagle Junction IT User Agreements.

#### Parent/Carer responsibilities

- Assist their child/ren with establishing routines to ensure iPads are charged and have adequate space available.
- Ensure required Apps are installed and iOS updates are completed (see App List on the following page).
- Organise a separate school folder for school Apps. This can be done by dragging and dropping the required Apps on top of each other which creates a folder and renaming the folder 'School Apps'.
- Understand that there is no insurance through the school for theft or damage.

### Frequently asked questions

#### Does my child need to bring their iPad every day?

Yes. It is important your child has their iPad at school every day to fully participate in the teaching and learning program.

#### How much storage will I need?

You will need adequate storage (minimum 40% free) so that new videos, photos and projects can be created at school.

#### Will my child use their iPad before school, after school or during break times?

iPads are not to be used before or after school, and must remain in bags until entering the classrooms. It is the students' responsibility to store their iPads in the allocated area in the classroom on arrival. iPads must remain in the classroom during breaktimes.

Thank you for your support.

Year 6 Teachers

New Apps for Year 6			Reasons for use
	IXL For Maths	Free	Provides access to individual IXL Accounts.
	Microsoft OneNote	Free	Provides students with access to online learning resources and activities set by the teacher. Students access by signing in with their school username and password.
	Microsoft Outlook	Free	Access to school emails. Students access by signing in with their school username and password.
	OneDrive	Free	Viewing and sharing files. Students access by signing in with their school username and password.
